

INFORMATION ABOUT THE PERSON FILLING THE FORM	
Name and family name	Milan Pernek
Research organization	Croatian Forest Research Institute - CFRI
Position in the organization	Senior researcher; Head of Division for Forest Protection and Game Management
Country	Croatia
E-mail	milanp@sumins.hr
EXPERIMENTAL SITE ¹	
Name of the site	Island Cres
Location of the site	Croatia Adriatic coastline
Start date	Year since the experimental site has been operative: 2009
Characteristics of the forest ecosystem where it is located	Holm oak
Keywords	Holm oak, defoliation, Lymantria dispar
Scientific characteristics	Scientific objective: assessment of defoliations of holm oak by caterpillars of Lymantria dispar Interest for users Particularities in comparison to others sites Research projects in the frame of which the experimental site is used (include web site address): http://stetnici.hr/
Technical characteristics	Detailed description (including instrumentation): Holm oak forest on the island Cres Most relevant features of plots recorded: Ecological and socioeconomical damages by defoliating large forest areas by Lymantria dispar. Periodicity of outbreaks and genetic analysis of Croatian and other gypsy moth populations by mtDNA and nuclear markers which shall reveal differences in gypsy moth races. Occurrence of pathogen of Lymantria dispar. Host preferences and biology of Lymantria dispar. If there is any file, map or images relevant about this infrastructure, please attach them (indicating here the name of the file).
SCIENTISTS AND/OR TECHNICIANS IN CHARGE OF THE INFRASTRUCTURE	
Principal investigator	Dr Milan Pernek, milanp@sumins.hr
One additional line per person	Dr Dinka Matošević, dinkam@sumins.hr
ADMINISTRATIVE INFORMATION	
Availability for participating in mutual measurements	Yes Conditions or Policy of use
Availability for accessing the data collected	No
