Enhancing FOrest RESearch in the MediTERRAnean through improved coordination and integration

	<p>- Vallombrosa state forest, Municipality of Pelago, province of Firenze, Italy 43° 43' 58"N, 11° 33' 26" E; 962 m a.s.l.</p> <p>- Valsavignone, Pieve S. Stefano, Arezzo, Italy, 43°44'06"N, 12°01'06"E, 700 m asl</p>
	Multiple
<b>Start date</b>	Multiple, the oldest started on 70th
<b>Characteristics of the forest ecosystem where it is located</b>	The sites cover the following forest types (black pine, Turkey oak, holm oak, chestnut, beech forests, douglas fir and valuable broadleaved plantations
<b>Keywords</b>	Silviculture, sustainable management, long-term monitoring, forest growth, rural development
<b>Scientific characteristics</b>	<p>This infrastructure aims at monitoring - by the experimental method - the long-term dynamics of forest systems, the comparison of differentiated or alternative theses, allowing to test their suitability and evaluate their effectiveness in terms of bio-ecology, economics, societal expectations, rural development</p> <p>Access to experimental sites to observe differences of forest attributes under different silvicultural options and available past data providing</p> <p>Particularities in comparison to others sites</p> <p>-</p>
<b>Technical characteristics</b>	<p>All sites are permanently marked in the forests. At least two different theses are tested per site.</p> <p>Biometric and growth related attributes. They depend on the single site.
